

# TECTORIUS® TRANS-KOTE™

Protective Liquid Transit Coating

## DESCRIPTION:

Trans-Kote™, leaves a clear, durable, protective covering on painted or finely finished parts. Once applied and dried, this family of products forms a hard, scratch-resistant coating strong enough to resist stone chips, dirt, weather, common debris and corrosion encountered in transport and long-term storage.

This liquid automotive covering will moderately adhere to the finished surface in order to disengage, rather than transfer stress to the paint, when damage is encountered.

Trans-Kote is specially formulated for automotive finishes found on body panels, exterior components and accessories. However, the product is recommended for any number of applications where water washing is part of the final operation.

## PRODUCT FEATURES:

- » **Practical:** Great for both the individual enthusiast and commercial/industrial use.
- » **Versatile:** patented technology can be used on any size or type of part. Specifically designed to coat and protect exterior automobile parts and accessories.
- » **Protective:** This clear, glossy, durable coating leaves surfaces scratch and mar resistant and prevents damage in a multitude of applications.
- » **Simple:** Easily applied and simply removed. Any unsightly dust, dirt, or grime is removed with the coating during washing with the appropriate additive.
- » **Environmentally friendly:** Safe, water-based formula eliminates traditional packaging.

*Trans-Kote liquid automotive covering eliminates packaging and protects surfaces, while also allowing for display.*

## SPECIFICATIONS:

Carrier Medium	Water
Viscosity	50-500 cPs
Liquid Appearance	Neutral or colorless, translucent
Dry Appearance	Clear, high gloss finish
Dry Texture	Hard, durable
