

TECTORIUS® WHEEL-EZ™

Protective Automotive Coating

DESCRIPTION:

Wheel-EZ leaves a durable and protective covering for aluminum, chromed, painted or finely finished wheels and rims. Once applied and dried, Wheel-EZ forms a crystal clear, scratch-resistant and expendable film that deters the unsightly accumulation of brake dust and road debris.

Designed specifically to resist acid rain and insect byproducts, Wheel-EZ forms a continuous shell that adheres to the coated surface. Dirt and unsightly debris are easily washed away, along with the film, by a high-pressure carwash water jet.

Wheel-EZ is effective on most exterior (even some interior) parts of the car including facias, grills, mirror housing, and bumpers.

METHOD OF USE:

- » Do not shake before application.
- » Spray on to cleaned surface. Allow to dry. Surfaces are now protected until the next washing.
- » To remove Wheel-EZ and dirt attached to the coating, wash with soap and water or pressure carwash.

SPECIFICATIONS:

Carrier Medium	Water
Viscosity	100-500cPs
Liquid Appearance	Colorless or neutral, translucent
Dry Appearance	Clear, high gloss finish
Dry Texture	Hard, durable
Water/Weather Resistance	Water, weather, and acid rain resistant

PRODUCT FEATURES:

- » Crystal clear, high gloss film prevents scratches to the surface.
- » Prevents accumulation of brake dust and allows for it to be easily washed away.
- » Any undesired grime that adheres to the wheel coating is removed with the coating during washing.
- » Safe, water based formula.
- » Easily applied, simply removed.
- » Spray on tires for a long lasting gloss black: no more need for numerous wheel care products.
- » Use to coat facias, grills or rocker panels to prevent chips and tar adhesion.
- » Apply to areas around door handles and keyholes for scratch prevention.
- » Blackens wheelhouses and wells while preventing adhesion of mud and tar.
