

# POLYMER 400N00

## MULTIPURPOSE, WATER-RESISTANT LUBRICANT

- GEAR OILS
- MOTOR OILS
- HYDRAULIC OILS
- PIPE COATINGS
- THREAD SEALANTS
- BEARING GREASES
- SPECIALTY GREASES
- THREAD COMPOUNDS
- SUCKER ROD COATINGS
- OUTSIDE PRESERVATIVES
- WIRELINE GREASE SEALS
- CLEANERS & DEGREASERS
- PIPE STORAGE COMPOUNDS
- RUST & CORROSION INHIBITORS
- THREAD LOCKING COMPOUNDS
- VALVE LUBRICANTS & SEALANTS
- TOOL JOINT & DRILL COLLAR COMPOUNDS

### PRODUCT DESCRIPTION

Polymer 400N00 is an excellent multipurpose, water-repellent grease, used where washout resistance is critical to the operation. Because of its excellent stability and EP characteristics, Polymer 400N00 remains on the bearing surface longer, extends lubrication intervals, and prolongs bearing life. Polymer 400N00 is fluoromated with LIQUILON®\* to provide a microscopic lubricating coating that eliminates metal-to-metal contact, provides residual lubrication long after conventional lubricants have washed out, and adds stability and resistance to chemical change. Polymer 400N00 fulfills complete lubricating grease requirements.

### BENEFITS

- Made with LIQUILON®\*
- Reduces friction and wear
- Resists wash out
- Provides residual lubrication to critical areas of downhole tools
- Premium multipurpose grease for all operations
- Prevents corrosion
- Services temperatures from 10°F to >450°F (-12°C to >232°C)

### APPLICATION

Polymer 400N00 is for application to a variety of wireline, drilling tools, equipment, vehicle lubrication, sealing, WKM gate, and pipeline ball valves. Polymer 400N00 is also used for lubrication to those areas of downhole tools where washout by drilling fluids, muds, and other downhole contaminants is common. Polymer 400N00 is an ideal lubricant when applied to wheel bearings and water pumps. Polymer 400N00 applications include bearings, high-temperature applications, water well rigs, wireline downhole tools, wireline vehicles, and pumps for grease injection systems. It is generally used for farm machinery and in industrial, automotive, marine, and manufacturing industries.

### TYPICAL OBSERVATIONS

Color	Light Green*
Texture	Smooth, Stringy
Thickener	Lithium Complex
Density, lb/gal @ 77°F (25°C)	7.15
